REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of "...a variable resistor for providing a resistance in response to a received signal, the variable resistor having a neutral position; a steering trimmer coupled to the variable resistor so that adjustment of the steering trimmer changes the neutral position of the variable resistor; a turning wheel..." are not anticipated or made obvious by the prior art of record in the examiner's opinion.

For example, Saitoh teaches a toy car operated by a wireless transmitter and receiver. The toy car includes an axle support frame (4) and a steering (trimmer) mechanism that includes a connecting disk (21) a connecting projection (19), a fish tail-fin shaped depression (24), a screw (22), a coiled spring (23), a spring (29), and a magnet core (16). The axle support frame is forced to restore the normal position by the spring (29). However, the prior art fails to teach "...a variable resistor for providing a resistance in response to a received signal, the variable resistor having a neutral position; a steering trimmer coupled to the variable resistor so that adjustment of the steering trimmer changes the neutral position of the variable resistor; a turning wheel..."
